Git

About Me

I am passionate about developing FOSS. I'm always excited to explore new technologies. I enjoy problem solving, and working with cross functional teams. I love to engage with others and develop a strong network!

Experience

Software Developer Intern
Sierra Nevada Brewing Company
04/2023 - Present
Asheville, NC

- Developed Ignition monoliths using various libraries, contributing to the overall enhancement of the application.
- Utilized T-SQL for various tasks, ensuring efficient database operations.
- Implemented back-end functionality using Python, enhancing the performance of server-side calls.

Network Technician
Microtech Knives
12/2021 - Present
Asheville, NC

- Performed network analysis.
- Coded automation scripts using Python and BASH.
- Performed system and database administration duties regularly.
- Installed and configured network and server architecture.

Projects

Pyile (Peer to Peer Application)

- Implementing thick client application that transfers files and messages via P2P.
- Utilizes multi-threading, encryption, low level sockets, and user authentication
- Command line and Graphical user interface capabilities using tkinter library
- Completely configurable using JSON
